

Interim-Einkaufsleitung Automobilzulieferer (1 Jahr)

Client	Function	Task	Duration
International Automotive supplier(Tier 1) approx. 3500 MA	Purchasing Management	Interim Purchasing Manager	1 Year
Problem			
A key issue was the need to optimise purchasing efficiency and processes to improve supply chains and reduce costs.			
Mission			
Bottleneck analysis and bottleneck management Supplier management and supplier selection Process optimisation in purchasing Cost reduction and negotiations			
Results			
Through bottleneck management and targeted supplier selection, the reliability and On-Time delivery of the purchased parts could be increased. Costs could be reduced by optimizing processes in purchasing. More efficient processes, the automation of recurring tasks and the avoidance of bottlenecks have enabled savings in procurement costs.
